JMA-5300Mk2
Black box radar

19” high visibility LCD screen
Constaview™ digital signal processing
TEF™ multi-level target enhancement
High speed version available
Brushless antenna motors for extended lifetime

– JRC’s new and innovative JMA-5300Mk2 radar series: navigation suddenly has a new standard

Complies with SOLAS carriage requirements for vessels under 10,000 GT and fully meets MSC.192(79) radar performance standards effective from 1 July 2008.

JRC Japan Radio Co., Ltd.
JMA-5300Mk2 series – performance features

Unique features
- JRC’s new JMA-5300Mk2 integrates the latest leading technologies with a set of new features, that allows running radar images faster and more efficiently than ever before.

Constaview™
The second generation and patented Constaview™ is realised through the use of three high-speed processors (in-house Tornado™ technology). All info gathered by the radar is fully processed within a few milliseconds before displayed, generating a smooth image rotation when sailing in Head-Up mode. When changing to North-Up, the new radar image is displayed without any delay caused by the scanner rotation.

Real time Head-Up mode
Constaview™

Select a trail length
Other ship’s movement and speed can be monitored from length and direction of their trails, primary serving for collision avoidance. The JMA-5300Mk2 integrates four different trail length modes, that will show a ship’s course instantly, a unique operational feature that allows for more flexibility. Example real-time processing:

- 1 min.
- 3 min.
- 6 min.
- 15 min.

Target Enhancement Function™
Developed exclusively by JRC, TEF™, allows target enhancement relative to the target size. The smaller echoes are far more enlarged than bigger echoes, giving a better on-screen separation and identification.
JMA-5300Mk2 series – developed for maximum ease of use

New keyboard design
With its new case design, the keyboard of the JMA-5300Mk2 series allows you to carry out all radar operations simply by using the keyboard or on-screen by use of the trackball.

The responsive feel keys allow logical and precise operation and integrates function keys for one-touch access to EBL, VRM, GAIN, SEA and RAIN. This makes it easy to navigate through all common used tasks.

Clear on-screen info
The JMA-5300Mk2 series make your radar images more brilliant than ever with a sharp 19” high resolution LCD screen.

Menu selections, via the keyboard or trackball are clearly shown on the display - allowing “at a glance” interpretation of the radar image.

You can also select day and night background modes and adjust the brilliance at your own convenience.

JRC StarNetwork™
JRC has been providing sales and support of products since 1915. Today, JRC offers comprehensive assistance through its organisation, in partnership with a worldwide StarNetwork™ of over 270 fully trained and qualified partners and agents, assisting you 24 hours a day, 7 days a week and 365 days a year.

JRC one-call™
One number to call
With JRC you can go anywhere and if you need our support, simply call us at +81 3 3492 9201, anytime.
Flexible black box configuration
The processor unit is the heart of the JMA-5300Mk2, and shares the same simple configuration as its predecessor, contributing to an enhanced system configuration. Optional TT (Target Tracking) function module with up to 100 targets, and or AIS interface, plotter control unit can be built in.

Wide dynamic range receiver
The new JMA-5300Mk2 series integrates a wide dynamic range receiver that, compared to conventional models, significantly improves the differentiation of noise and targets under sea clutter. The radar system overcomes different sources of unwanted signals, maintaining a constant level of overall visible clutter.

More powerful than ever
The JMA-5300Mk2 incorporates three Tornado™ processors, which are exclusively developed and designed by JRC, bringing a new level of performance and reliability to radar operation. The new Tornado™ processors, which equal the power of twelve conventional processors, and advanced system architecture make the JMA-5300Mk2 series probably the most sophisticated radar available today.

CCRP
As set by IMO regulations, a Consistent Common Reference Point (CCRP) is a location on own ship, to which all horizontal measurements, such as target range, bearing, relative course/speed, closest point of approach, or time to closest point of approach are referenced.

Where multiple antennas are installed, different position offsets for each antenna in the radar system should be applied with respect to the CCRP. If you switch between scanners (up to 8 possible - option), the information displayed is generated allows for consistency and uniform output. This new feature is easily accessible from the menu.

Interswitching
Optional interswitching up to 8 displays possible.

What’s standard in the box?
1. Display
2. Scanner
3. Keyboard
4. Processor
5. Cables
6. Spare parts
7. Manual (English)

Optional items

1) AC100-120/220-240V (50/60Hz, 1Ø). AC power is required for JMA-5332-12 antenna motor scanner. All specifications are subject to change without notification.
2) Performance monitor, ARPA or ATA, AIS and gyro unit must be fitted on ships compliant to IMO.
